📍 Akwa Ibom, Nigeria

PROFESSIONAL SUMMARY

Data Analyst with 1+ year of hands-on experience transforming raw datasets into actionable insights using Python, SQL, and Power BI. Built interactive dashboards and deployed data applications (Streamlit) used by teams to monitor KPI's and improve decision-making. Strong background in mathematics and statistical analysis, with a focus on solving real business problems through data.

TECHNICAL SKILLS

Languages & Databases	Python (Pandas, NumPy, Matplotlib, Seaborn) · SQL (MySQL)
Visualisation & BI	Microsoft Power BI · Tableau · Streamlit · Google Sheets
Spreadsheets	Microsoft Excel — Advanced Functions, Pivot Tables, VLOOKUP, Dynamic Dashboards
Analytical Methods	Exploratory Data Analysis (EDA) · Data Cleaning & Preparation · Statistical Analysis · Data Modelling

CORE COMPETENCIES

Analytical Thinking Identify meaningful trends through statistical reasoning and structured problem-solving.	Data Storytelling Translate complex findings into clear, visual narratives for non-technical stakeholders.	Attention to Detail Deliver clean, accurate datasets and dashboards with a commitment to quality output.

EXPERIENCE

Trainee Data Analyst — Start Innovation Hub Nigeria

Apr 2025 – March 2026

Internship · Akwa Ibom, Nigeria · On-site

- Progressed from apprentice to Data Analyst Intern within 12 months based on performance and contribution.
- Processed and analyzed 5+ datasets (up to 9,000+ records), improving data quality and usability for analysis.
- Built 3 dashboards in Power BI and Tableau — used by a 4-person team weekly to track KPIs and catch performance gaps early.
- Cut manual reporting time by 40% by writing Python scripts to handle what Excel was doing by hand.
- Turned a Titanic EDA notebook into a live Streamlit app — 10+ people filtering and exploring the data themselves in real time.
- Presented findings to 5+ stakeholders who needed answers, not charts — learned fast how to speak data to non-data people.

PROJECTS & PORTFOLIO

Customer Sentiment Analysis for Nigerian Digital Banking Platforms — EDA & Streamlit App

Tools: Python · Pandas · Matplotlib · Seaborn · Streamlit

- Developed and deployed an interactive Streamlit web application to analyse customer sentiment from digital banking app reviews.
- Applied NLP techniques to classify user feedback into positive, neutral, and negative sentiment categories.
- Analysed sentiment trends to identify key drivers of customer satisfaction and dissatisfaction across platforms.
- Discovered recurring issues including transaction failures, app downtime, and poor user experience.
- Delivered actionable insights to improve customer retention, product performance, and service quality.

Sales Performance Dashboard — Superstore Dataset Analysis

Tools: Microsoft Excel · Pivot Tables · VLOOKUP · Conditional Formatting

- Analysed 9,000+ retail sales records to evaluate sales performance, profitability trends, and regional KPIs.
- Built a dynamic executive dashboard using Pivot Tables and Slicers to surface total revenue, profit margins, and category-level performance.
- Identified the top 5 most profitable product sub-categories and regional sales patterns, delivering insights to support inventory planning and marketing strategy.

Titanic Survival Rate Analysis — EDA & Streamlit App

Tools: Python · Pandas · Matplotlib · Seaborn · Streamlit

- Performed comprehensive EDA on the Titanic passenger dataset (1,046 records) to identify key factors influencing survival outcomes.
- Cleaned and processed data using Pandas; handled missing values via statistical imputation techniques.
- Uncovered those female passengers and first-class traveller had significantly higher survival rates — visualised findings with clear, presentation-ready charts.
- Built an interactive Streamlit web app featuring filters by gender, class, and age, KPI cards, and dynamic charts enabling real-time exploration of survival patterns.

Cookie Sales Financial Dashboard — Power BI

Tools: Microsoft Power BI · DAX · Power Query

- Analysed multi-country sales data across 5 countries and 6 product categories, uncovering **\$4.69M revenue, \$2.76M profit, and 58.9% profit margin**.
- Built and designed an interactive Power BI dashboard with KPI cards, revenue by country bar chart, profit by product donut chart, and quarterly sales trend analysis.
- Implemented dynamic slicers (year, quarter, product) to enable **real-time drill-down analysis for decision-making**.
- Identified high-performing product categories and key regional profit drivers, supporting **data-driven strategic planning**.

E-Commerce Sales Performance Dashboard — Excel

Tools: Microsoft Excel · Pivot Tables · Power Query · Conditional Formatting

- Cleaned and analysed a messy e-commerce dataset covering \$161,940 total revenue, 277 units sold, and 91 total orders across multiple product categories and payment methods.
- Built a multi-chart Excel dashboard covering revenue trend over years, monthly sales trend, order status breakdown, category performance, top 5 products by revenue, and payment method analysis.
- Included Top 5 Customers table and a Key Insights section translating findings into business recommendations.
- Identified that PayPal dominated payment methods at \$64,758 and 2024 was the peak revenue year at \$140,335 — insights relevant to payment strategy and forecasting.

EDUCATION

Bachelor of Science (B.Sc.) — Mathematics (In View)

Expected 2025 / 2026

Akwa Ibom State University · Akwa Ibom State, Nigeria

- Relevant coursework: Statistics, Probability Theory, Linear Algebra, Calculus, Mathematical Modelling.
